
Auto On When Powering Up

Posted by jimbtv - 2007/10/20 17:15

Is there any way to configure the XRX to power up when VDC is applied, instead of pressing the "on" button?

We can and have made this change, which is minor but requires the unit to be sent to us. The XRX's power supply will be reconfigured to power up whenever power is present. There is a nominal \$25 charge to cover the mod and shipping back to you, and a 2-day lead time. If you'd like us to do this, just call us to receive an RMA.
