
Bendix/King KMD550

Posted by talvaro - 2009/06/14 22:40

I have a C-172-SP with NAV II package which includes GPS KLN94 and MFD KMD550. I would like to add a PCAS but I couldn't find the interface between the XRX and the MFD. Is this something possible?

Thanks

You can't legally interface a non-certified unit like the XRX to a certified unit like the 550.
