
XRX with AVMAP EKP-IV and EFIS D100

Posted by duperron - 2010/06/16 06:28

Have anybody got to solve the following issue?

When I turn on reception of XRX messages in the AVMAP interface (see attached image) then the GPS stops talking to the EFIS D100.

It means I can have autopilot, wind speed and direction OR XRX warnings but not both.

Best Regards,

Duperron
