## \\"Reverse installation\\"

Posted by airmet - 2010/07/09 13:45

---

I want to install XRX behind the pilot head (in the center of the airplane) with display facing forward. It will be in garmin mode and traffic displayed on Garmin 695.

Is this kind of reverse installation possible and how "if" do I change traffic display info in menu.

Thanks, Iztok Š.
