
Rev history for manual

Posted by Mike/Glasair - 2007/03/15 07:22

Can you please post a list of revisions to the manual and/or make the changed pages downloadable for incorporation into the old manual?

Just bought an MRX after the favorable review in Aviation Consumer.

Being a good doo-bee, I downloaded Rev C. of the manual.

NOTE: The downloaded manual says it's Rev D. But the link on the web site says it's Rev C.

I don't see any way to know what pages have been updated. I ended up scanning the entire Rev C manual. Looks like the only change is the graphic of the 5 way multi-function switch? If you've published a notice of revisions, I missed it.

Could you, as a minimum, list the changes from revision to revision in a revision history? (A la Jeppeson approach plates.)

Better yet, how about offering the changed pages for download, with Rev markings on them for tracking purposes? That way, we can print out the pages and stuff them into the book.

Hope this helps,

Mounting unit how did you do it

Posted by tazbird - 2007/08/07 22:13

Mike,

How did you mount your MRX in your airplane?

I have a XRX and plan on mounting mine to the Glareshield using a Glareshield clip by RAM mounts.

The XRX does not fit on top of my Glare shield.

Your MRX probably just fits on top of the Glareshield.

Carter

If there is not room to put it on top of the instrument panel, Zaon sells a suction cup mount. It is a bit unweildy, but does solve some mounting issues.
