## Firmware Version?

Posted by PPPCory - 2007/01/15 13:01

---

I would like to see the firmware versions posted and more importantly, kept up to date. I note on the previous site that the MRX for the past 10 months had displayed V1.2 as the latest although mine shipped with 1.3 back in March/06. I have been advised that there have been several updates since that time.

What revisions have taken place? Any bug fixes which would have warranted a firmware update?

Cory

Cory

I sent & back my XRX a few months ago to update it. Mine is ver 1.9 now.

I'm totally satisfy this product. But I'm in Japan so it took a long time, need the shipping cost and to prepare some documents for send & back through overseas to upgrade the firmware... It's very annoying.

I hope Zaon would provide the utility software to upgrade the firmware by ourselves soon.
