
XRX integration with Bendix/King KMD150

Posted by roarj - 2009/10/01 05:36

Hi.

Is the XRX integrated with the Bendix/King KMD 150?

Or will it be in the near future?

Kind Regards

The rules as I understand them prevent you from legally sending information to a certified device from a non certified device. So, I believe you can't legally do what you are asking. XRX communicates with a variety of portable devices but no panel mounts I know of.

This is correct. The XRX will work with these Bendix/King portable models though:

AV8OR Ace
AV8OR Handheld
AV8OR Horizon 3D
AV8OR Vision 3D
